Today's Application

Today I treated your whole lawn for **broad leaf weeds and gave your lawn a root vitamin (potassium).**

This is the first routine treatment of the 2010 growing season and I will be out every other month to treat the lawn this season.

It takes approximately 25 days for the weed control to work. If you still have weeds in a few weeks, please call us. We will gladly treat weeds year round if you place a service call.

Please water this application in today or tomorrow for 20 minutes per zone. You are allowed an extra day to water this in outside of water restrictions.

Thank you for choosing Trad's Pest Control. We will always do our best to make you happy.

Sprayer/Date

How do you get a weed free lawn?

- ★ Over time
- ★ Bag clippings, don't reseed weeds
- ★ Mow regularly at the highest setting
- ★ Water to prevent a dry lawn
- ★ Make service calls for weed treatments
- ★ Sign up for Crabgrass or Sedge treatments if you need it
- ★ Pull weeds in beds before they move to the lawn

Trad's will gladly spot treat broad leaf weeds year round if you place the service calls

Bugs bugging you? Call Trad's to get rid of the bugs that bite you and want to live in your home

Refer your friends and neighbors to Trad's. If they sign up, we will give you \$10.00 off your next monthly payment.

Our 2010 Predictions:

- Cold damage to sensitive plants
- Frost damage to lawns
- Resistant chinch bugs
- Heavy weeds

Place Service Calls at the first sign of trouble or if you need weeds treated. We are usually able to check your lawn in a few days.

Do you have a question? Need a service call?
